To Whom It May Concern:

This letter is to commend Bill Vermeulen of Sunrise Landscape on a job very well done in the planning, installation and ongoing maintenance of our front, back and side yards.

Bill worked with us during the construction of our new home. He joined the project after a basic landscape/hardscape plan was in place, but was responsible for the actual implementation, which included numerous adjustments and fine-tuning of the original plan. Bill was knowledgeable, responsive, flexible, timely, hardworking, and thorough throughout the process, and continues to work hard to make sure we have a high level of customer satisfaction.

Bill was willing to meet me at landscape supply yards during the selection of plants, and was patient as I made final decisions. His knowledge of and experience with plants was very helpful. The installation also included irrigation as well as a lighting system, which greatly enhances the beauty of the final result.

He and his crews started and completed each phase of the job when promised, and Bill himself was active and hands on during the planting process.

At one point, when we were under a pending inspection deadline, Bill and his crew willingly pitched in and worked very hard on an aspect of the project that was actually beyond the scope of landscape to assist us in meeting that deadline. Our appreciation was huge!!

Our job site was left clean by Bill's crews as they ended each day's work. Bill also was diligent in providing paperwork and an accounting of proposals and bills. He has routinely been very accessible and available by phone.

I would highly and without reservation recommend Bill Vermeulen and Sunrise Landscape for any project for which he feels qualified to apply.

Sincerely,

Cynthia Talbott
